KMA PROGRESSION IN RE

This document aims to give guidance on the progression of RE knowledge and skills across the year groups.

It can also be used to differentiate work, and expectations, appropriately for pupils working above and below age-related expectations (particularly SEND pupils and GD pupils). Their increasingly critical thinking should be reflected in their attitude towards the world and the increasing confidence they have to express views and feelings independently.

In RE, like all other subjects, we recognise the importance of the methods and practice of teaching (the pedagogy) we choose to use in enabling pupils to know more, understand more and remember more. In RE, the following approaches will be used, and be evident in pupil discussion, observations and work in books, in order to ensure that the RE learning opportunities are as effective as possible and that pupils progress throughout the year and across year groups during their RE experiences in school:

TEACHING SEQUENCE IN RE Introduce children to The Big Picture, what they will be learning today and what they have been taught in previous year groups. Provide children with a daily review to provide feedback and consolidation from previous learning, using a variety of teaching strategies. Provide realistic and relevant information Opportunities for the children to work interactively, using other curriculum areas e.g music, drama, art, with the teacher acting as the facilitator. Individual reflection on the learning.

	Meta-cognition in RE
Activating prior knowledge	The teacher discusses with children the learnt strategies and content in previous reading lessons
Explicit strategy instruction	The teacher explicitly explains how to organise their ideas, with the emphasis on the cognitive strategy 'cause and effect' model' to help them organise and plan
Modelling of learned strategy	Use initial notes to model one part of the strategy
Memorisation of strategy	The teacher tests if pupils have memorised the key aspects of the strategy through questions and discussions
Guided practice	The teacher models one further example with the whole group, with pupils verbally contributing ideas
Independence practice	Pupils complete their own task
Structured reflection	The teacher encourages pupils to reflect on how appropriate the model was, how successfully they applied it, and how they might use it in the future.
